

Postdoctoral Research Opportunities in the Saunders Lab (Vollum Institute)

The [Saunders Laboratory](#) at the [Vollum Institute](#) (Oregon Health and Science University; Portland, OR USA) has fully-funded postdoctoral research positions focused at the intersection of neuroscience, virology and single-cell genomics. Our group uses molecular barcoding to 1) study virus – host brain cell interactions and 2) to map cell and synaptic properties of neural circuits in high-throughput. We develop genomic technology to understand how genetic variation within and across species shapes neural circuit structure and function.

PhDs with a background in computational biology, molecular biology, electrophysiology or virology are encouraged to apply.

The Vollum Institute is a world-renowned center for cell and molecular neuroscience nestled in Portland, OR. Portland offers the best of city life as well as easy access to some of the most stunning mountains, coast and high-desert in the United States.

If interested, please email your CV and a cover letter to Dr. Arpiar Saunders (saundear@ohsu.edu).
